Services to Keep you in the Field When it Matters

Our Service team has the right knowledge and tools to keep your equipment running its best throughout its entire life. Brandt delivers in-depth product training for our Service Technicians from both the John Deere factory and our own in-house expert trainers; a clear understanding of the advanced technology on your equipment; the latest connected diagnostic tools; and quality work from a knowledgeable team that is proud to assist your farm, ranch, acreage or landscaping business.

PROACTIVE SERVICE

We understand your equipment is your livelihood, and it needs to perform when you need it to. Brandt Agriculture now offers three proactive services to match each piece of equipment on your farm:

Brandt Inspections – offer you an in-depth review of your equipment covering every system on your machine. It provides the best protection against in-season repairs that will cause downtime and lost productivity. When you are looking for the ultimate proactive protection, the Brandt Inspection is your best option.

Brandt Walkarounds – are a high-level review of the critical operating systems on your machine. It offers you insight on repairs needed that may cause downtime. Have our factory-trained technicians review your machine to get a clear understanding of the operation of its critical systems before it is put to work.

Brandt Jobs – give you the fix you need to prepare for next season proactively.

VALUE TIERS

As equipment operates and wears over time, operating costs can increase as additional repairs are required. To help extend your equipment's value throughout its life, we have introduced three value tiers for Inspections, Walkarounds and Jobs. No matter the age, hours or use of your equipment, it is our goal to help match the right level of service needed to the job at hand to ensure you get the best value for your equipment during its lifespan.

PREMIUM	ADVANTAGE	CLASSIC

EQUIPMENT MANUFACTURED IN 2015-2022

WHAT'S IN IT FOR YOU?

- Uptime guarantee – we stand behind the work we do – if work that we complete on premium tier equipment causes downtime in-season, we will provide a comparable machine on loan if we cannot fix your machine within 24 hours
- The peace of mind knowing your equipment is serviced by Service Technicians with the latest factory training, tooling, and connected diagnostics tools
- Our Service Technicians are equipped with the latest John Deere connected support tools to proactively identify, alert and complete repairs
- Reliable John Deere parts used in premium repairs are backed by a one-year warranty

PREMIUM JOBS (2015-2022)

★ (GOOD)

All jobs pricing listed below are labour rates only. Parts and supplies are not included.

SERVICE NAME	EQUIPMENT TYPE	WHY IS THIS SERVICE IMPORTANT	START AT
Air Conditioner Health Check	All Equipment	Beat the heat this summer and ensure your air conditioning is in proper working order.	$159.92
Hydraulic Pump Flow Check	All Tractors	Make sure your tractor is putting out the maximum flow to run your implements correctly.	$76.96
Steering Cylinder Pin and Bushing Replacement	4WD Tractors	Save time and effort by replacing your steering cylinder pin and bushings to improve your 4WD tractor's steering ability.	$431.78

SERVICE NAME	EQUIPMENT TYPE	WHY IS THIS SERVICE IMPORTANT	START AT
Water Pump Replacement	4WD Tractors	Prevent engine damage by replacing the water pump on your 4WD tractor. Recommendation: Replace every 4000 hrs	$799.60
Injector Cup Replacement	4WD Tractors	Avoid hard starting, extended crank time and low power by ensuring you complete this maintenance item. Recommendation: Replace every 4000 hrs	$2,398.80
Articulating Pin Replacement	4WD Tractors	Keep your 4WD tractor moving correctly by replacing your articulating pins. Recommendation: Replace every 4000–5000 hrs	$2,238.88
Air Cart Winterization	Air Drill/Seeder	The metering system is a precision tool that can corrode if not properly winterized.	$639.68
Axle Shim Adjustment	Sprayer	Regular maintenance of the axle shims is important for proper function. Axles can wear, stick and ultimately result in axle failure if not properly maintained.	$119.94
Driveshaft Replacement	Sprayer	Improper maintenance of your driveline can cause the driveline to break. Replacement of the driveshaft is often needed once the damage is past repair.	$239.88
Fuel System Flush	Sprayer	Proactively avoid problems with power loss caused by contaminants in your fuel system with a fuel system flush.	$239.88
Hub Oil Replacement	Sprayer	Increase the life of your hubs by keeping your oil clean. Important to remember that overfilling your hubs can cause overheating.	$79.96/per hub
Full Surface Wrap Adjustment	Baler	A misaligned or uneven net wrap setup can result in numerous adjustments and repairs while you are in the field. Adjust your net wrap system, and you will be able to "Make hay while the sun shines!"	$199.90
Main Driveshaft Slip Clutch Replacement	Baler	Failure to adjust your driveshaft slip clutch can result in premature wear. Remember to check and adjust your slip clutch.	$239.88
HarvestLab Calibration	SPFH	HarvestLab measures sugar, starch, and proteins. It also detects moisture content during harvest and allows your machine to work at peak efficiency.	$199.90

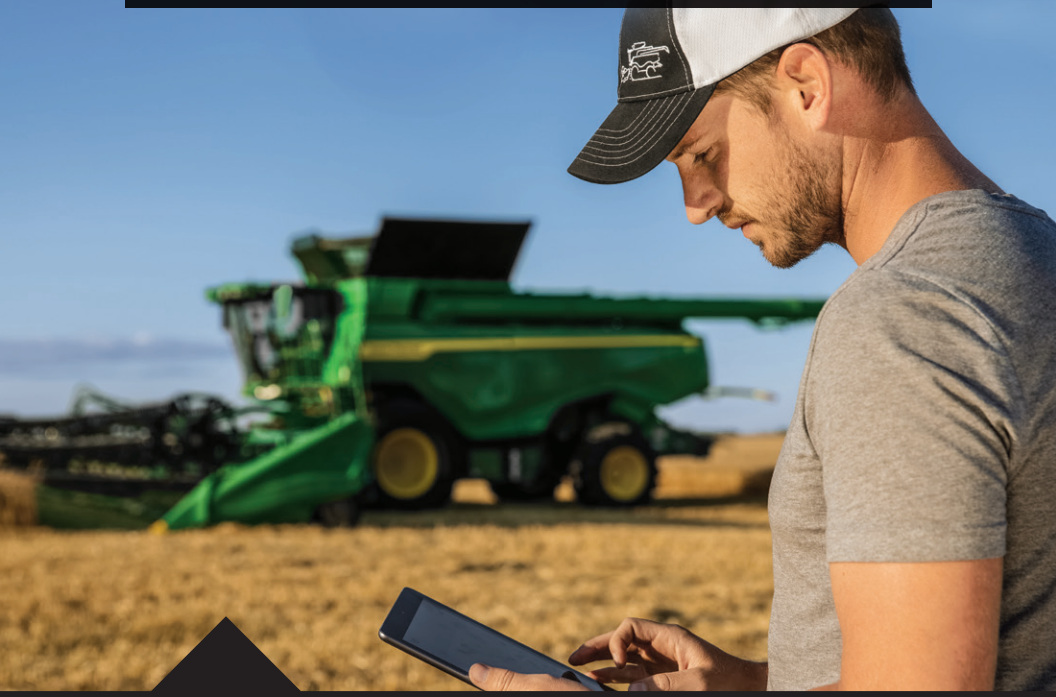
OTHER

Services

OPTIMIZATIONS* AND UPGRADES



Increase efficiency and improve profits and accuracy with optimization services and hardware upgrades. Our optimization services can be performed YEARLY in-season or pre-season. Our team at Brandt Agriculture will guarantee your equipment is field-ready and ensure you have a clear understanding of operating your equipment effectively.

WHY OPTIMIZE ANNUALLY?

- Ensure up-to-date machine software
- Consistent settings and preparation each year
- Increase knowledge and comfort of new practices

*This includes setup and optimization of receivers and displays as needed. Prices for optimization services are fixed not hourly.

GUIDANCE OPTIMIZATION VALUE PACKAGE

During the offseason, your equipment's guidance calibrations and settings can be impacted. Our guidance optimization package allows a member of the Brandt Agriculture to make sure everything is setup and calibrated properly so you can begin your applications or harvest.

- TCM Calibration
- AB Guidance Line Setup (Single Machine)
- Machine & Implement Offset Calibration
- Setup File Creation (Operations Center)

SERVICE TYPE	START AT
Guidance	$750.00

SEEDING TECHNOLOGY OPTIMIZATION VALUE PACKAGE

Seeding is the most important time of year for your operation and has the most variables to overcome. Our Seed Technology Optimizations allow you to spend some time with our experts as we refresh you on the operation of your seeding equipment as well as make sure the equipment is calibrated and mechanically ready for you to hit the fields the minute the weather allows.

- Section Control Setup & Optimization
- JDLink™ Fleet Setup & Year-end Report
- TCM Calibration
- AB Guidance Line Setup (Single Machine)
- Machine & Implement Offset Calibration
- Seeding Setup File Creation (Operations Center)

SERVICE TYPE	START AT
Seeding Technology (Machine and Data Optimizations)	$2,500.00

SPRAYING TECHNOLOGY OPTIMIZATION VALUE PACKAGE

Your sprayer potentially takes on the greatest number of hours during the growing season. Herbicide, fungicide, pesticide, and liquid fertilizer applications all run through your sprayer, so ensuring it is setup correctly is key to maintaining your operations efficiency. Our Sprayer technology packages certify that your sprayer is in elite condition throughout the growing season.

- Section Control Setup & Optimization
- JDLink™ Fleet Setup & Year-end Report
- TCM Calibration
- AB Guidance Line Setup (Single Machine)
- Spraying Setup File Creation (Operations Center)

SERVICE TYPE	START AT
Spraying Technology (Machine and Data Optimizations)	$2,000.00

COMBINE TECHNOLOGY OPTIMIZATION VALUE PACKAGE

Your combine is one of the most important and complex pieces of equipment for your business. Our Combine Technology Optimizations allow Brandt Agriculture to refresh you on how to get the most out of your combine while making sure everything is fully functional. Let us help you relieve some of the stress during the harvest season by making sure your combine is well maintained.

- Auto Maintain Optimization
- Active Yield Optimization
- Yield/Moisture Optimization (Combine or Grain Cart)
- JDLink™ Fleet Setup & Year-end Report
- Agrimatics Setup & Operator Training
- TCM Calibration
- AB Guidance Line Setup (Single Machine)
- Machine Offsets Setup
- Harvest Setup File Creation (Operations Center)

SERVICE TYPE	START AT
Combine Technology (Machine and Data Optimizations)	$2,500.00

PERFORMANCE UPGRADES

Maximize your productivity and increase efficiency with a Performance Upgrade Kit for your equipment.

SERVICE NAME	EQUIPMENT TYPE	WHY IS THIS SERVICE IMPORTANT	START AT
ExactApply Kits	Sprayers	Reduce over-application, crop burn and off-target drifting which reduce application costs to your operation.	$57,391.64
SectionCommand Kits	Seeders	Reduce overlaps and skips while planting and ultimately improve your bottom line.	$43,017.54
4WD PTO Kits	4WD Tractors	Add power and speed to your 4WD tractor, maximizing the usage and efficiency.	$24,793.00
S-Series Header & Feederhouse Seal Kits	Combines	Minimize grain loss when direct-cutting canola and can be utilized for other small grain crops (up to a 45% decrease in losses from the center feed section compared to previous models).	$1,461.06
ActiveYield	Combines	Improve yield data accuracy and uptime by eliminating time spent calibrating.	$5,999.00
