Agriculture TRAINING COURSES

AMS/PRECISION AG TECHNOLOGY | SEEDERS/PLANTERS | APPLICATORS | HAYING EQUIPMENT | HARVEST EQUIPMENT | TRACTORS

People. Power. Service.™

JOHN DEERE | CERVUS EQUIPMENT

AMS/PRECISION AG TECHNOLOGY

Gen 4 – 4600, 4640, 4200, 4240

Attendees will learn how to navigate their Gen 4 display, perform a receiver calibration, set up a tracking line, and input documentation requirements. Includes the use of an online simulator and an introduction to John Deere Operations Centre.

Type: classroom
Class size: 6–10
Length: half-day
$99

Greenstar 2/3 – 1800, 2600, 2630

Attendees will learn how to navigate their GS2 or GS3 display, perform a receiver calibration, set up a tracking line and input documentation requirements. Includes an introduction to John Deere Operations Centre.

Type: classroom
Class size: 6–10
Length: half-day
$99

SEEDERS/PLANTERS

Air Seeder

Attendees will be guided through the complete seeding operation, including information on machine connection, display setup, calibration of cart and drill, seed placement and optimization, safety and maintenance.

Type: in-field
Class size: 6–10
Length: full-day*
$199

Corn Planter

Attendees will receive comprehensive training on maintenance, operation, safety, connecting the planter to tractor, seed placement and optimization.

Type: classroom or in-field
Class size: 6–10
Length: full-day*
$199

APPLICATORS

Wet Application

Attendees will learn ExactApply™ setup and operation, nozzle body maintenance, nozzle selection, chemical and machine safety, machine maintenance and AMS setup. Includes the use of an online simulator.

Type: clinic**
Class size: 6–10
Length: full-day*
$199

Dry Application

Attendees will learn chemical safety, machine maintenance, spreader setup and calibration and AMS setup. Includes the use of a simulator in classroom.

Type: clinic**
Class size: 6–10
Length: full-day*
$199

Wet or Dry Application

Attendees will be guided through areas of the sprayer as required. Areas include: Application setup, calibration, operation, safety, maintenance, cleanout, and winter storage.

Type: in-field
Class size: 1–2
Length: hourly (min 2)
$175

HAYING EQUIPMENT

Round Baler

Attendees will learn proper machine connection, monitor setup, operation, maintenance, safety, as well as use of netwrap, twine, accumulator and baler automation if applicable.

Type: clinic**
Class size: 6–10
Length: half-day/full-day*
$99/$199

Large Square Baler

Attendees will gain comprehensive training on machine connection, operation, safety and maintenance.

Type: clinic**
Class size: 6–10
Length: half-day
$99

Windrower

Attendees will gain comprehensive training on machine connection, operation, safety and maintenance.

Type: clinic**
Class size: 6–10
Length: half-day
$99

Moco (Mower Conditioner) Pull-Type

Attendees will gain comprehensive training on machine connection, operation, safety and maintenance.

Type: clinic**
Class size: 6–10
Length: half-day
$99

Moco (Mower Conditioner) Self-Propelled

Attendees will gain comprehensive training on machine connection, operation, safety and maintenance.

Type: clinic**
Class size: 6–10
Length: half-day
$99

HARVEST EQUIPMENT

Combine

Attendees will learn machine operation, maintenance and safety. We will go into detail on material flow through machine, harvest optimization, AMS setup, calibrations and combine platform overview. Includes the use of an online simulator.

Type: clinic**
Class size: 6–10

Length: full-day*
$199

Combine Platform

Attendees will learn machine operation, maintenance and safety as well as proper machine connection and calibration.

Type: clinic**
Class size: 6–10

Length: half-day
$99

Combine In-Field

Attendees will learn machine operation, maintenance and safety. We will discuss material flow through machine, harvest optimization, AMS setup, calibrations and combine platform overview.

Type: in-field
Class size: 1–2

Length: hourly (min 3)
$175

Self-Propelled Forage Harvester

Attendees will learn machine operation, maintenance and safety, optimization, AMS setup, calibrations and platform overview.

Type: clinic**
Class size: 1–2

Length: half-day
$99

TRACTORS

Utility/Compact/Turf

Attendees will learn machine operation, maintenance and safety. We will also cover the procedure of connecting/disconnecting and the proper use of attachments.

Type: classroom
Class size: 1–2
Length: half-day
$99

Row Crop

Attendees will learn machine operation, maintenance, and safety. We will also cover the procedure of connecting/disconnecting and the proper use of attachments as well as ballasting.

Type: clinic**
Class size: 6–10
Length: half-day/full-day*
$99/$199

Articulated 4WD

Attendees will learn machine operation, maintenance and safety. We will also cover the procedure of connecting/disconnecting implements as well as transmission settings and engine optimization.

Type: clinic**
Class size: 6–10
Length: full-day*
$199

ONE-ON-ONE

On-Site Training

We offer all of our listed training one-on-one by appointment at your location.

Type: on-site
Class size: 1–2
Length: hourly
$175

TERMS & CONDITIONS

TRAINING

Training is for:

- New and used John Deere (OEM) equipment. Used equipment training will be provided on equipment model year 2013 to present.
- New non-OEM equipment (sold by Cervus).

With the purchase of any qualifying piece of large ag equipment, training will be provided at no extra cost for 2 people on that specific machine (training must take place within one calendar year of purchase).

PAYMENT

Payment for training will be required at time of booking.

WAITLIST

Registration will be taken on a first-come, first-served basis with payment required at the time of registration. In the case that a course is full, a waitlist option will be available to fill cancellations. Payment will be required once registration is confirmed.

CANCELLATION POLICY

Notice of cancellation must be provided via email or phone call to the Training Manager (see contact information) a minimum of one week prior to the training date.

*Lunch will be provided during all full-day training.

**Uses classroom for theory and appropriate model of machine for walk around and demonstrations.
