POWERED BY QUALITY

PACCAR AXLES

POWERED BY QUALITY

The PACCAR front steer axle delivers a lightweight and durable option to enhance customer vehicle payload. Available with weight ratings from 20,000 – 22,000 pounds, the front axle is designed for demanding applications such as construction, heavy haul, refuse, and other vocational uses. It utilizes innovative tapered kingpin roller bearings for more efficient operation and improved steering efficiency. The PACCAR Front Axle, Powered by Quality.

The PACCAR Front Axle is available in a wide track or standard configuration to meet a broad range of customer applications.

PACCAR AXLE HIGHLIGHTS

- Robust Forged Steel Beam Construction for Long-Lasting Performance
- Lightweight Design Provides Increased Load Capacity for Maximum Profitability
- Optimal Maneuverability with Turn Angle up to 50 Degrees
- Compatible with Front Air Disc Brakes or Drum Brakes for Outstanding Versatility
- Kingpin Roller Bearing Design for Improved Steering Efficiency and Operation
