

# smartnav™

Peterbilt's Premium interiors feature the groundbreaking SmartNav, an in-dash system specifically designed for the truck industry that provides diagnostic, communication and entertainment functionality. SmartNav offers user interface capabilities and vehicle interface read-outs including audible and visual alerts and notifications, Bluetooth hands-free calling and audio streaming, vehicle diagnostics, and multiple entertainment options. Enhancements include expanded audio controls and ten new virtual gauges. SmartNav also now includes dead reckoning, which helps maintain the truck's location when positioned in areas where the satellite signal is blocked. Other SmartNav tools include an alarm clock, as well as a video feature that allows the use of an external device such as an iPod.

For more information on SmartNav, contact your local Peterbilt dealer or visit [www.peterbilt.com](http://www.peterbilt.com)

SmartNav features a high-resolution, 7-inch touch screen that is glove-friendly, scratch-resistant and allows drivers to easily and intuitively operate the system. Six "hot buttons" along the bottom of the screen provide one-touch access to all of the key features of the SmartNav system.

### TRUCK MONITORING

Virtual gauges provide real-time information on important vehicle data such as fuel flow rate, pressure, horsepower usage, engine oil temperature and transmission temperature. A number of new optional gauges are also now available.

### NAVIGATION

The Garmin truck-specific navigation system maps routes that consider trucking parameters, such as bridge heights and weight restrictions. This exclusive feature also highlights Peterbilt-specific points of interest.

### PHONE

Fully voice-recognition enabled, the phone feature logs calls and stores contact information for those using a Bluetooth-paired device.

### AUDIO SYSTEM

The unit features AM/FM/Weather bands, radio data streaming, Sirius satellite radio for subscribers, an MP3 capable CD player, USB port for memory devices containing MP3 or audio files, iPod capabilities and Bluetooth A2DP audio streaming from enabled Bluetooth devices.
