

579

579

PROVEN DURABILITY. SUPERIOR PERFORMANCE. **PETERBILT** QUALITY.

We started with a rich history of proven quality and built an all-new truck to reflect it. Combining aerodynamics, durability and reliability, the 579 is the result of Peterbilt's legendary craftsmanship and innovation. With the introduction of the 579, we illustrate our passion for unrivaled performance.

The Model 579 has a wide, spacious cab that surrounds the driver in comfort and efficiency. Through interviews and testing, drivers helped us design the optimal size for our new cab. The 579 is available in 117" and 123" BBC configurations, as well as 44", 72" & 80" detachable sleepers that add versatility and the longevity of a second life for highest resale value. The 579 provides efficient fuel consumption and optimized aerodynamics to deliver the most cost-effective Class 8 model to date. Plus, we've introduced a visionary new forward lighting system for superior visibility as well as standard air disc brakes.

For more information on the Model 579, contact your local Peterbilt dealer or visit www.peterbilt.com

COMFORT & PRODUCTIVITY

A quiet and spacious cab offers drivers a comfortable environment to work and relax. Built with classic Peterbilt amenities and valuable improvements where it counts.

AERODYNAMICS

Use of computational fluid dynamics delivers a supremely aerodynamic and efficient truck. Aero Package additions – fairings, skirts and close-outs – add to application-specific fuel savings.

PERFORMANCE

The PACCAR MX-13 engine delivers industry-leading quality, exceptional reliability and proven performance. Power offerings are expanded with the addition of a 500 hp rating with 1,850 lb-ft of torque.

VISIBILITY

New headlamps and fog lamps maximize down-road visibility and coverage while reducing driver eye fatigue. Optional HID headlamps increase brightness by 220%.

SMARTNAV™

An integrated telematics and infotainment system, which provides real-time truck monitoring, truck-specific navigation, hands-free Bluetooth® connectivity and satellite radio.
