BETTER MACHINE AND JOB PERFORMANCE AND AGRONOMIC DECISIONS

Contact your local Cervus Precision Ag Specialist today or visit us online at cervusequipment.com/john-deere

GET THE MOST VALUE OUT OF YOUR EQUIPMENT

Fully integrate your equipment, technology and services together to improve your equipment uptime and make better decisions for your operation.

1 DATA JOURNEY with my Precision Ag Specialist

I have a John Deere account
Logging into a myjohndeere.com allows you access to John Deere's Operation Center to manage: technology subscriptions, collect and analyze machine and agronomic information, view parts catalogues and order parts.

I have an active terminal
Lighting up your MTG terminal in your machine allows you JDLink Access for: machine location history, essential machine information, geo-fence machines and remote diagnostics.

I am documenting data
Upgrading to JDLink Connect™ subscription allows you to document data using John Deere Display Access™ to view critical data, and move machine data easily through John Deere Wireless Data Transfer, and gain machines dignostics information through John Deere Service Advisor.

I am making agronomic data decisions
Managing your operations date in real-time allows you and your trusted advisors to analyze results and make adjustments to improve your operation through year over year data trends.

2 CONNECTED SUPPORT JOURNEY with my dealership Service Manager

I have a John Deere account
Logging into a myjohndeere.com allows you access to John Deere's Operation Center to manage: technology subscriptions, collect and analyze machine and agronomic information, view parts catalogues and order parts.

I have an active terminal
Lighting up your MTG terminal in your machine allows you JDLink Access for: machine location history, essential machine information, geo-fence machines and remote diagnostics.

I have a fully connected machine
Using the six connected support tools offered to you by your local dealership allows your Cervus John Deere team to communicate your machines performance in real-time and inform you about improvements that need to be made with your operation.

I am making performance decisions
Communicating in real-time with your local Cervus John Deere dealership allows you to make informed decisions to keep your operation moving forward.
