

DRIVER PERFORMANCE ASSISTANT

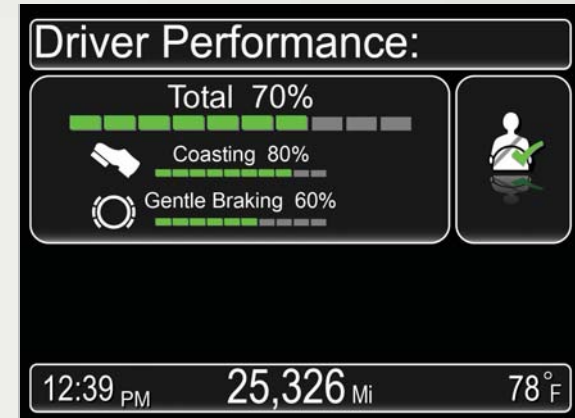

TURN GREAT DRIVING HABITS INTO FUEL SAVINGS.

DRIVER PERFORMANCE ASSISTANT

Peterbilt's Driver Performance Assistant (DPA) improves fuel economy and overall vehicle performance by utilizing an in-dash, visual messaging system that helps make good driving habits great. DPA provides visual prompts to assist the driver during vehicle operation regarding behaviors such as coasting, braking, HVAC usage, idling and tire inflation – all of which contribute to vehicle performance and fuel economy. Features include anticipation and brake saving scoring that encourage alternate methods to save on brake wear as well as fuel savings tips for both driving and parked scenarios. DPA is available on Peterbilt's Models 579, 567, 587 and 220 with PACCAR engines.

For more information on Driver Performance Assistant, contact your local Peterbilt dealer or visit www.peterbilt.com

Help every driver perform like your best driver.

ANTICIPATION SCORING

DPA promotes good driving practices that improve fuel economy by reinforcing the need to maximize coasting and minimize braking.

BRAKE-SAVING SCORING

Operators are encouraged to maximize the use of retarder devices and minimize use of foundation brakes, prolonging brake life.

PARKED COACHING TIPS

While parked, messages are displayed that reflect fuel-economy impacts for various vehicle conditions, such as HVAC usage, tire pressure, vehicle speeds and idling.

DRIVING TIPS

Drivers receive prompts that provide quantified fuel-economy impacts for various vehicle conditions, such as tire pressure monitoring, coasting, braking and brake-saving suggestions.
